

## **ARTICLE 714.**

### **PD 714.**

#### **West Commerce Street/Fort Worth Avenue Special Purpose District**

##### **SEC. 51P-714.101. LEGISLATIVE HISTORY.**

PD 714 was established by Ordinance No. 25898, passed by the Dallas City Council on February 23, 2005. (Ord. 25898)

##### **SEC. 51P-714.102. PROPERTY LOCATION AND SIZE.**

PD 714 is established on property located north and south of West Commerce Street and Fort Worth Avenue from North Beckley Avenue to Westmoreland Road. The size of PD 714 is approximately 410.427 acres. (Ord. Nos. 25898; 26876; 27056; 28505; 31570; 32073)

##### **SEC. 51P-714.103. CREATION OF SUBDISTRICTS.**

(a) This district is divided into the following subdistricts:

(1) Subdistrict 1. This subdistrict is for medium density mixed-use development that respects existing businesses but gives incentive for new mid-rise commercial and residential development. Development should support West Commerce Street as the gateway from downtown into the area, and strengthen the Sylvan Avenue-Fort Worth Avenue intersection as a retail anchor. New development should support future light rail along the northern edge of the subdistrict. Preserving historic buildings through adaptive re-use is a priority. This subdistrict will be the most densely developed urban subdistrict due to its proximity to the Trinity River and downtown. The mix of uses should lean more to commercial, although residential development is essential to the success of the mixed uses. Buildings should front the street with broad sidewalks. Street trees should line the street edge. On-street parking should be parallel parking along West Commerce Street and Fort Worth Avenue. Off-street parking should be provided behind buildings or in parking structures and shared between adjacent lots. This subdistrict should have an overall urban feel, but still provide pedestrian amenities. Subdistricts 1A, 1B, 1C, 1D, and 1E have maximum building heights and maximum stories that reflect the rising topography and protect the downtown view. Buildings should have minimum or no setbacks, with commercial and retail uses at the ground level and office and residential above. Pedestrian protections from traffic, such as street trees, planters, and crosswalks, are desired. Subdistricts 1A, 1B, 1C, 1D, and 1E are part of Subdistrict 1. Except as provided in this article, Subdistrict 1 regulations apply in Subdistricts 1A, 1B, 1C, 1D, and 1E.

(2) Subdistrict 2. Subdistrict 2 is a mixed-use subdistrict that consists predominately of residential uses, but with some small retail and office uses. Because residential neighborhoods are adjacent to the subdistrict, it should be more serene than other subdistricts. New development should strengthen the existing residential neighborhoods and help to create a pedestrian-friendly environment. North Edgefield Avenue should connect the north and the south neighborhoods. Pedestrian protections from traffic, such as on-street parking, street trees, and parkways, are desired. Buildings should have minimum or no setbacks. Building heights are controlled separately in Subdistricts 2A, 2B, 2C, and 2D to optimize medium density residential development, preserve downtown views, and be sensitive to the existing single-family neighborhood to the north. Preserving historic buildings through adaptive re-use is a priority. Subdistricts 2A, 2B, 2C, and 2D are part of Subdistrict 2. Subdistrict 2 regulations apply in Subdistricts 2A, 2B, 2C, and 2D unless otherwise indicated.

(3) Subdistrict 3. Subdistrict 3 is a mixed-use subdistrict primarily developed with commercial and retail uses, but with some residential uses. Retail and commercial areas should be strengthened with more varied uses. New development should include residential uses and vertical stacking of uses for more efficient land use resulting in activity throughout the day and night. Buildings should have minimum or no setbacks. Off-street parking should be provided behind buildings and shared between neighboring lots. Use of traffic calming elements such as median plantings, on-street parking, street trees, broad sidewalks, and low-to-mid-rise buildings is desirable. Development should strive to create a village center accessible by pedestrians, bicycles, mass transit, and cars. Land uses are controlled separately in Subdistricts 3A, 3B, 3C, and 3D to be sensitive to residential neighborhoods. The regulations in Subdistrict 3 apply to Subdistrict 3D unless otherwise provided.

(4) Subdistrict 4. Subdistrict 4 is a mixed-use subdistrict dominated by multifamily uses. While commercial and retail uses are encouraged at street level, maintenance of the residential density is desired. Pedestrian protections from traffic, such as broad sidewalks, street trees, and crosswalks, are desired. New construction should be oriented to address the street front. Existing slip roads providing on-street parking and pedestrian amenities should be preserved. Building height, land use, and setbacks are controlled separately in Subdistricts 4A and 4B to encourage mixed use and townhouse development. Subdistricts 4A and 4B are part of Subdistrict 4. Subdistrict 4 regulations apply in Subdistricts 4A and 4B unless otherwise indicated.

(5) Subdistrict 5. Subdistrict 5 is a mixed-use district balanced with residential, commercial, and retail uses. New development should include vertical stacking of different uses to achieve more efficient land use and activity throughout the day and night. New development should also include a medium density residential component to strengthen surrounding residential neighborhoods and ensure the success of commercial and retail development. Building heights and uses are controlled to be sensitive to residential neighborhoods. New development should strengthen pedestrian connections on Fort Worth Avenue. Buildings should have minimum or no setbacks, with commercial and retail uses at the ground level and office and residential uses above. Off-street parking should be provided behind buildings and shared between neighboring lots. Pedestrian protections from traffic, such as broad sidewalks, street trees, planters, and crosswalks, are a priority.

(b) Exhibit 714A is a map showing the boundaries of this district and its subdistricts. Exhibit 714B is a verbal description of the boundaries of this district and its subdistricts. In the event of a conflict between the graphic depiction in Exhibit 714A and the verbal description in Exhibit 714B, the verbal description in Exhibit 714B controls.

(c) This district is considered to be a mixed-use zoning district. (Ord. Nos. 25898; 26876; 27056; 27820; 28505; 29654; 30610; 32104; 32175; 32411)

(i) Residential uses within 50 feet of Fort Worth Avenue may not have a garage door facing Fort Worth Avenue.

(ii) Residential uses may not have a garage door facing Colorado Boulevard or Walter Drive.

(E) Street car/trolley shelter. In Subdistricts 4A and 4B, a street car/trolley shelter is exempt from the front yard requirements, but must be at least five feet from the edge of a roadway.

(2) Side and rear yard.

(A) Except as provided in Subparagraph (B), minimum side and rear yard is:

(i) 20 feet where adjacent to or directly across an alley from an R, R(A), D, D(A), TH, TH(A), CH, MF, or MF(A) district or a residential use (but not a mixed-use project with a residential component);

(ii) 15 feet in Subdistrict 4B; and

(iii) no minimum in all other cases.

(B) Except in Subdistrict[s] 4A, an additional side and rear yard setback of one foot for each two feet in height above 45 feet is required for that portion of a structure above 45 feet in height, up to a total setback of 30 feet.

(C) In Subdistricts 4A and 4B, a carport is allowed within the side or rear yard setback. Carports must remain open. Storage of items other than motor vehicles within a carport is prohibited.

(D) In Subdistricts 4A and 4B, a streetcar/trolley shelter is exempt from the side and rear yard requirements, but must be at least five feet from the edge of a roadway.

(3) Density.

(A) No maximum dwelling unit density.

(B) Minimum dwelling unit size is 450 square feet.

(4) Floor area ratio.

(A) Except as provided in this subsection, maximum floor area ratio (FAR) varies depending on whether the development is a mixed-use project as follows:

[Note: The first column is the base FAR, which applies when there is no mixed-use project. The second column (MUP=2/no res.) is the FAR for a mixed-use project with a mix of two use categories when neither category is residential. The third column (MUP=2/with res.) is the FAR for a mixed-use project with a mix of residential plus one other use category. The fourth column (MUP=3/with res.) is the FAR for a mixed-use project with a mix of residential plus two or more other use categories. A mixed-use project with three use categories must include a residential use.]

Use category	Base (no MUP)	MUP=2 (no res.)	MUP=2 (with res.)	MUP=3 (with res.)
Lodging	1.6	2.5	3.0	3.5
Office	1.6	2.5	3.0	3.5
Residential	1.6	--	3.0	3.5
Retail and personal service	1.0	1.1	1.2	1.3
Total	--	2.5	3.0	3.5

(B) A street car/trolley shelter is not counted as floor area.

(C) No maximum floor area ratio for a shared access development in Subdistrict 4B.

(5) Height.

(A) Subdistrict 4.

(i) Residential proximity slope. If any portion of a structure is over 26 feet in height, that portion may not be located above a residential proximity slope. Except for chimneys, structures listed in Section 51A-4.408(a)(2) may project through the slope to a height not to exceed the maximum structure height, or 12 feet above the slope, whichever is less. Chimneys may project through the slope to a height 12 feet above the slope and 12 feet above the maximum structure height. A mounted cellular antenna may exceed residential proximity slope if located atop an existing structure that is nonconforming to residential proximity slope.

(ii) Maximum height. Maximum structure height is 180 feet.

(iii) Temporary cellular unit. A temporary cellular unit must comply with the yard, lot and space regulations of the district and may not exceed the height of the existing tower/antenna for cellular communication use to be removed. Lightning rods atop a temporary cellular unit are not included in height calculations. A temporary cellular unit is not subject to the residential proximity slope. If a temporary cellular unit collocates existing operators on a single vertical temporary cellular unit, the following regulations apply:

(aa) If the height of the existing mounted cellular antenna to be removed is less than the maximum structure height of the district, the maximum structure height may extend an additional 10 feet in height for each existing operator above one, not to exceed the maximum structure height of the district.

(bb) If the height of the existing mounted cellular antennas to be removed is equal to or exceeds the maximum structure height of the district, the maximum height of the temporary cellular unit may not exceed the height of the existing mounted cellular antennas to be removed.

(B) Subdistrict 4A.

(i) Residential proximity slope.

(aa) Except as otherwise provided in this subparagraph, if any portion of a structure is over 20 feet in height, that portion may not be located above a residential proximity slope. The residential proximity slope is a plane projected upward and outward at a one-to-two slope beginning at a point seven feet above grade at the site of origination, as shown on Exhibit 714G.

(bb) The residential proximity slope is infinite.

(cc) The residential proximity slope does not apply to a residential use 40 feet in height or less.

(dd) Except for chimneys, structures listed in Section 51A-4.408(a)(2) may project through the residential proximity slope to a height not to exceed the maximum structure height, or 12 feet above the residential proximity slope, whichever is less. Chimneys may project through the residential proximity slope to a height 12 feet above the residential proximity slope and 12 feet above the maximum structure height.

(ee) The residential proximity slope applies only to MF-1(A) adjacency. For the southernmost portion of this subdistrict, the site of origination is the north and northwest lines of the Wedglea Creek Addition as shown on Exhibit 714H.

(ii) Maximum height. Maximum structure height is 180 feet.

(C) Subdistrict 4B.

(i) Residential proximity slope.

(aa) Except as otherwise provided in this subparagraph, if any portion of a structure is over 20 feet in height, that portion may not be located above a residential proximity slope. The residential proximity slope is a plane projected upward and outward at a one-to-two slope beginning at a point seven feet above grade at the site of origination, as shown on Exhibit 714G.

(bb) The residential proximity slope terminates 150 feet from the site of origin.

(cc) Except for chimneys, structures listed in Section 51A-4.408(a)(2) may project through the residential proximity slope to a height not to exceed the maximum structure height, or 12 feet above the residential proximity slope, whichever is less. Chimneys may project through the residential proximity slope to a height 12 feet above the residential proximity slope and 12 feet above the maximum structure height.

(ii) Maximum height. Except as provided in this romanette, maximum structure height is 42 feet. The highest point of a structure with a gable, hip, gambrel, or dome roof may project a maximum of 12 feet above the maximum height.

(6) Lot coverage.

(A) Except as provided in this paragraph, maximum lot coverage is 80percent.

(B) In Subdistricts 4A and 4B, maximum lot coverage is 90 percent. Subdistrict 4B is considered to be a multifamily district for lot coverage purposes in accordance with Section 51A-4.411.

(C) Aboveground parking structures are included in lot coverage calculations; surface parking lots and underground parking structures are not.

(7) Lot size. No minimum lot size.

(8) Stories.

(A) Maximum number of stories above grade is 12, except that maximum number of stories above grade in Subdistrict 4B is three.

(B) Parking garages are exempt from this paragraph, but must comply with the height regulations of Paragraph (5).

(d) Off-street parking and loading. See Section 51P-714.113, “Off-Street Parking and Loading.”

(e) Environmental performance standards. See Article VI.

(f) Landscape regulations. Except as modified in Section 51P-714.114, “Landscaping,” see Article X.

(b) Accessory uses.

(1) As a general rule, an accessory use is permitted in any subdistrict in which the main use is permitted. Some specific types of accessory uses, however, due to their unique nature, are

subject to additional regulations in Section 51A-4.217, “Accessory Uses.” For more information regarding accessory uses, consult Section 51A-4.217.

(2) In this subdistrict, the following accessory uses are not permitted:

(c) Yard, lot, and space regulations.

(Note: The yard, lot, and space regulations in this subsection must be read together with the yard, lot, and space regulations in Division 51A-4.400, “Yard, Lot, and Space Regulations.” In the event of a conflict between this subsection and Division 51A-4.400, this subsection controls.)

(1) Front yard.

- (A) Minimum front yard is 15 feet.
- (B) Maximum front yard is 60 feet.

(2) Side and rear yard.

- (A) Except as provided in Subparagraph (B), minimum side and rear yard is:
  - (i) 20 feet where adjacent to or directly across an alley from an R, R(A), D, D(A), TH, TH(A), CH, MF, or MF(A) district or a residential use (but not a mixed-use project with a residential component); and
  - (ii) no minimum in all other cases.
- (B) An additional side and rear yard setback of one foot for each two feet in height above 45 feet is required for that portion of a structure above 45 feet in height, up to a total setback of 30 feet.

(3) Density.

- (A) No maximum dwelling unit density.
- (B) Minimum dwelling unit size is 450 square feet.

(4) Floor area ratio. Maximum floor area ratio (FAR) varies depending on whether the development is a mixed-use project as follows:

[Note: The first column is the base FAR, which applies when there is no mixed-use project. The second column (MUP=2/no res.) is the FAR for a mixed-use project with a mix of two use categories when neither category is residential. The third column (MUP=2/with res.) is the FAR for a mixed-use project with a mix of residential plus one other use category. The fourth column (MUP=3/with res.) is the FAR for a mixed-use project with a mix of residential plus two or more other use categories. A mixed-use project with three use categories must include a residential use.]

Use category	Base (no MUP)	MUP=2 (no res.)	MUP=2 (with res.)	MUP=3 (with res.)
Lodging	1.6	2.5	3.0	3.5
Office	1.6	2.5	3.0	3.5
Residential	1.6	--	3.0	3.5
Retail and personal service	1.0	1.1	1.2	1.3
Total	--	2.5	3.0	3.5

(5) Height.

(A) Residential proximity slope. If any portion of a structure is over 26 feet in height, that portion may not be located above a residential proximity slope. Except for chimneys, structures listed in Section 51A-4.408(a)(2) may project through the slope to a height not to exceed the maximum structure height, or 12 feet above the slope, whichever is less. Chimneys may project through the slope to a height 12 feet above the slope and 12 feet above the maximum structure height.

(B) Maximum height. Maximum structure height is 60 feet.

(6) Lot coverage.

(A) Maximum lot coverage is 80 percent.

(B) Aboveground parking structures are included in lot coverage calculations; surface parking lots and underground parking structures are not.

(7) Lot size. No minimum lot size.

(8) Stories.

(A) Maximum number of stories above grade is four.

(B) Parking garages are exempt from this paragraph, but must comply with the height regulations of Paragraph (5).

(d) Off-street parking and loading. See Section 51P-714.113, “Off-Street Parking and Loading.”

(e) Environmental performance standards. See Article VI.

(f) Landscape regulations. Except as modified in Section 51P-714.114, “Landscaping,” see Article X. (Ord. 25898)

**SEC. 51P-714.113.**

**OFF-STREET PARKING AND LOADING.**

(a) In general. Except as modified in this section, consult the use regulations in Division 51A-4.200 for the specific off-street parking and loading requirements for each use. Except as modified in this section, consult the off-street parking and loading regulations in Divisions 51A-4.300 et seq. for information regarding off-street parking and loading generally. For parking purposes, Subdistricts 1D and 1E are each considered one lot.

(b) Remote parking. Except as provided in this section, remote parking is allowed if it is located within 600 feet of the main use and the requirements of Division 51A-4.320, "Special Parking Regulations," are met. Except for residential uses, all of Subdistrict 4A is considered one building site for parking purposes.

(c) Residential.

(1) One space per bedroom up to a maximum of two spaces per dwelling unit.

(2) In Subdistricts 4A and 4B, for purposes of this subsection, a bedroom is defined as having at least 100 square feet of floor area and direct access to a closet.

(3) In Subdistrict 4A, at least one parking space per residential unit must be located on the same building site as the residential unit. Any additional required parking spaces must be located on a building site within Subdistrict 4A and within 200 feet of the building site containing the residential use.

(d) Restaurant.

(1) One space per 125 square feet of floor area.

(2) Except as provided in this subsection, any outdoor dining area, whether or not covered, counts as floor area for calculation of the parking requirement. For purposes of this provision, "outdoor dining area" means a rectangular area that includes all outdoor tables, chairs, and wait-stations.

(3) In Subdistricts 4A and 4B, 50 percent of an outdoor dining area, whether or not covered, is excluded for calculation of the parking requirement as long as the outdoor dining area is within 20 feet of, and has direct access to, a street, sidewalk, or publically accessible open space. This exclusion only applies to an area up to 20 percent of the size of the indoor floor area. Any portion of an outdoor dining area in excess of 20 percent of the size of the indoor floor area must be parked in accordance with Paragraph (2).

(e) Retail and personal service in Subdistricts 4A and 4B. Except for a business school; commercial amusement (inside); furniture store; nursery, garden shop, or plant sales; and theater, one space per 250 square feet of floor area. The floor area of a sales/leasing office and amenities for residential uses that are part of a mixed use project do not count for purposes of determining parking calculations. The non-residential portion of a live/work unit is treated as an office or a retail and personal service use for parking purposes.

(f) Retirement housing in Subdistricts 4A and 4B. 0.7 spaces per dwelling unit or suite. In Subdistrict 4A, all required parking must be located on the same building site as the retirement housing use.

(g) Above-grade off-street parking. Parking is permitted on any level of a building.

(h) Bicycle parking.

(1) Except as provided by this subsection, if an institutional and community service use, mixed-use project, or retail and personal service use has a floor area of 4,000 square feet or more, it must provide a lockable rack for a minimum of two bicycles.

(2) In Subdistrict 1E, one bicycle parking space per six dwelling units is required for

multifamily projects that develop under Section 51P-714.108.2(c)(1). A minimum of 75 percent of required bicycle parking must be located on the same property as the use requiring the bicycling parking. Remaining bicycle parking may be dispersed across the subdistrict. Required off-street parking may be reduced by one space for every six bicycle parking spaces provided on a building site. Required bicycle parking must otherwise comply with the requirements of Section 51A-4.330.

(i) Mixed-use shared parking reduction.

(1) Office and residential uses within a mixed-use project must share parking. Any shared parking must be on the same building site as the mixed-use project. The number of off-street parking spaces required for the mixed-use project is 100 percent of the parking requirement for the use requiring the greater number of spaces plus 25 percent of the parking requirements for the use requiring fewer spaces. For example, if the office component would separately require 100 spaces and the residential component would separately require 80 spaces, then the parking requirement for the mixed-use project is 120 spaces  $[(100 \times 1.00) + (80 \times .25) = 120]$ .

(2) Retail and residential uses within a mixed-use project must share parking. Any shared parking must be on the same building site as the mixed-use project. The number of off-street parking spaces required for the mixed-use project is 100 percent of the parking requirement for the use requiring the greater number of spaces plus 75 percent of the parking requirements for the use requiring fewer spaces. For example, if the retail component would separately require 100 spaces and the residential component would separately require 80 spaces, then the parking requirement for the mixed-use project is 160 spaces  $[(100 \times 1.00) + (80 \times .75) = 160]$ .

(3) If a mixed-use project has office, retail, and residential uses, the project must use the parking reduction that offers the greatest reduction, but may not use both. For example, if the office-residential reduction reduces the parking to 120 spaces and the retail-residential reduction reduces the parking to 160 spaces, then the office-residential reduction must be used and the retail-residential reduction may not be used.

(4) The parking reduction in this subsection may not be used in Subdistrict 1C.

(j) On-street parallel, straight, or angled head-in parking.

(1) Except as provided in this subsection, any on-street parallel parking spaces on West Commerce Street, Fort Worth Avenue, or a street that intersects Fort Worth Avenue may be counted toward the parking requirement of the use adjacent to the on-street parallel parking space. In Subdistrict 1E, any on-street parking spaces on West Main Street or a street that intersects West Commerce Street may be counted towards the parking requirement of the use adjacent to the on-street parking space.

(A) An on-street parallel parking space may not be used to reduce the required parking for more than one use, except that an on-street parking space may be used to reduce the combined total parking requirement of a mixed-use project.

(B) An on-street parking space that is not available to the public at all times of the day may only be counted as a partial parking space in proportion to the amount of time that it is available. For example, a parking space that is available to the public only eight hours per day will be counted as one-third of a parking space  $(8 \div 24 = \text{one-third})$ . The total of the limited availability parking spaces will be counted to the nearest whole number, with one-half counted as an additional space.

(2) In Subdistrict 4A, any on-street parallel, straight, or angled head-in parking space may be counted toward the total off-street parking requirement of the use adjacent to the on-street parallel, straight, or angled head-in parking space.

(A) An on-street parking space may not be used to reduce the required parking for more than one use, except that an on-street parking space may be used to reduce the combined total

parking requirement of a mixed-use project.

(B) An on-street parking space that is not available to the public at all times of the day may only be counted as a partial parking space in proportion to the amount of time that it is available. For example, a parking space that is available to the public only eight hours per day will be counted as one-third of a parking space ( $8 \div 24 = \text{one-third}$ ). The total of the limited-availability parking spaces will be counted to the nearest whole number, with one-half counted as an additional space.

(3) In Subdistrict 4B, parallel, straight, or angled head-in parking accessed from the alley between Subdistrict 4B and Colorado Boulevard is allowed and screening from the alley is not required.

(4) In Subdistrict 4B, on-street parallel, straight, or angled head-in parking may be counted towards the total off-street parking requirement.

(A) An on-street parking space may not be used to reduce the required parking for more than one use, except that an on-street parking space may be used to reduce the combined total parking requirement of a mixed-use project.

(B) An on-street parking space that is not available to the public at all times of the day may only be counted as a partial parking space in proportion to the amount of time that it is available. For example, a parking space that is available to the public only eight hours per day will be counted as one-third of a parking space ( $8 \div 24 = \text{one-third}$ ). The total of the limited-availability parking spaces will be counted to the nearest whole number, with one-half counted as an additional space.

(k) Parking to the rear of the main structure.

(1) Except as provided in the paragraph, in Subdistricts 1A, 1B, and 1D, 100 percent of any parking for new construction located on the same building site as the main use must be to the rear of the main structure. In Subdistrict 1E, off-street surface parking may not be located between a street-facing facade and public right-of-way and off-street structured parking must be provided in compliance with subsection (l). In Subdistrict 1D and 1E, compliance with this paragraph is only required after the demolition of an existing structure built prior to 1985.

(2) Except as provided in this subsection, in Subdistricts 2, 3, 4, and 5, only 25 percent of any parking for new construction located on the same building site as the main use, or one row of parking, whichever is fewer spaces, may be located in front of the main structure. In addition, only one drive aisle may be located in front of the main structure. This paragraph does not apply to Subdistrict 2D or to a general merchandise or food store greater than 3,500 square feet with a floor area more than 10,000 square feet in Subdistrict 3D.

(3) In Subdistrict 4B, one row of parking is allowed in front of the main structure with no limit on the percentage of total parking.

(l) Parking structures.

(1) In Subdistrict 4A, if an aboveground parking structure is located within 200 feet of an adjacent residential district not dedicated to a public park, playground, or golf course use, the parking must be concealed in a structure with a facade similar in appearance to the main structure's facade. At least 12 percent of the parking structure facade, including openings, must be covered with the same material predominately used on the first 24 feet in height of the main structure. Openings in the aboveground parking structure may not exceed 52 percent of the total facade.

(2) Except as provided in this subparagraph, aboveground parking structures are prohibited in Subdistrict 4A within 100 feet of a residential district not dedicated to a public park, playground, or golf course use. If an aboveground parking structure is located in that portion of Subdistrict

4A shown on Exhibit 714H, which is located within 100 feet of the boundary of the adjacent residential district, the aboveground parking structure must be aligned with the existing aboveground parking structure. If the existing aboveground parking structure in the adjacent residential district is demolished or is not used for parking prior to construction of the aboveground parking structure in Subdistrict 4A, the aboveground parking structure in Subdistrict 4A must be located more than 100 feet from the boundary line of the adjacent residential district.

(3) In Subdistrict 2D, parking structures must have a facade similar in appearance to the main structure's facade. At least 12 percent of the parking structure facade, including openings, must be covered with the same material predominately used on the first 24 feet in height of the main structure. Openings in the aboveground parking structure may not exceed 52 percent of the total facade.

(4) In Subdistrict 1E, parking structures must be located behind a primary use except as otherwise provided in this paragraph.

(A) Blocks 4 and 6.

(i) 40 percent of the ground story facade may be allowed as a parking structure provided that the parking structure is setback a minimum of 20 feet from West Main Street to allow for open space or outdoor dining areas between the street and parking structure and the parking facade is similar in appearance to the main structure facade.

(ii) Additional stories above the ground story of a parking structure are not required to be located behind a primary use provided that the parking facade is similar in appearance to the main structure facade.

(B) Screening for all parking structures. All parking structures must be constructed to screen vehicle headlights from adjacent properties. Screening may include louvers, landscaped green walls, architectural grill work, or other materials that provide ventilation. This provision does not apply to parking structure facades facing railroad right-of-way.

(m) Loading.

(1) In Subdistricts 1D, 4A, and 4B, a nonresidential use with a floor area greater than 10,000 square feet, but less than 20,000 square feet, per occupancy must have one small size loading space as defined in Section 51A-4.303.

(2) In Subdistricts 4A and 4B, a required loading space may be located within the public right-of-way.

(3) Structures in Subdistrict 1D built prior to 1985 may provide loading within interior floor area.

(4) In Subdistrict 1E, residential loading must be located outside the public right-of-way. For the purposes of this paragraph, Blocks 4 and 6 as shown on the conceptual plan are exempt.

(n) Parking lanes and private drives In Subdistricts 1D and 4B, parking lanes and private drives may be accessed from an alley.

(o) Subdistrict 2D.

(1) Single building site. For purposes of off-street parking, this subdistrict is considered one building site.

(2) Special parking. A maximum of 50 percent of off-street parking may be special parking.

(p) Subdistrict 1E.

(1) Co-working and creative office uses must provide parking at a ratio of 1 space per 333 square feet of floor area before the application of any reductions.

(2) Food hall uses must provide parking at a ratio of 1 space per 125 square feet of floor area. Outdoor dining areas are included for the purposes of parking.

(3) Makerspace uses must provide parking at a ratio of 1 space per 1,000 square feet of floor area before the application of any reductions.

(4) Off-street parking requirements for projects in compliance with Section 51P-714.108.2(c)(1) are reduced by 25 percent for non-residential uses, including non-residential accessory uses to a residential use that are open to the public for service or membership. (Ord. Nos. 25898; 26876; 27820; 28505; 29654; 30610; 30705; 32104; 32411)

(f) Open space fund.

(1) If a property owner cannot plant all of the required trees on the building site, the property owner shall make a payment into the West Commerce Street/Fort Worth Avenue Open Space Fund for no more than 50 percent of the required trees.

(2) The amount of the payment required per tree not planted is calculated by using the formula for appraising the value of a tree equal in caliper to the tree not planted, as derived from the most recent edition of the *Guide for Establishing Values of Trees and Other Plants* published by the Council of Tree and Landscape Appraisers, unless another publication is designated by the building official, and adding the cost of planting and maintaining the tree for two years as determined by the park and recreation department.

(3) The department shall administer a city account to be known as the West Commerce Street/Fort Worth Avenue Open Space Fund. Funds from the West Commerce Street/Fort Worth Avenue Open Space Fund must be used only for acquiring and maintaining property for parks and open space within this district and for median landscape improvement on West Commerce Street or Fort Worth Avenue. The Fort Worth Avenue Development Group, its successor or a similar organization, should be consulted on uses of the fund

(g) Landscaping in the public right-of-way.

(1) Landscaping may be located in the public right-of-way if a right-of-way landscape permit is obtained from the city.

(2) The city council hereby grants a non-exclusive revocable license to the owners or tenants (with written consent of the owner) of all property within this district for the exclusive purpose of authorizing compliance with the landscaping requirements of this district. An owner or tenant is not required to pay an initial or annual fee for this license, although a fee may be charged for issuance of a right-of-way landscape permit. This private license will not terminate at the end of any specific time period; however, the city council reserves the right to terminate this license at will, by resolution passed by the city council, at any time such termination becomes necessary. The determination by the city council of the need for termination is final and binding. The city shall become entitled to possession of the licensed area without giving any notice and without the necessity of legal proceedings to obtain possession when, in its judgment, the purpose or use of the license is inconsistent with the public use of the right-of-way or when the purpose or use of the license is likely to become a nuisance or threat to public safety. Upon termination of the license

by the city council, each owner or tenant shall remove all improvements and installations in the public rights-of-way to the satisfaction of the director of public works and transportation.

(3) A property owner or tenant is not required to comply with any right-of-way landscaping requirement to the extent that compliance is made impossible due to the city council's revocation of a right-of-way landscape permit or the revocation of the private license granted under this subsection.

(4) Upon the installation of landscaping in the public right-of-way, the owners or tenants shall procure, pay for, and keep in full force and effect commercial general liability insurance coverage with an insurance company authorized to do business in the State of Texas and otherwise acceptable to the city, covering, but not limited to, the liability assumed under the private license granted under this subsection, with combined single limits of liability for bodily injury and property damage of not less than \$1,000,000 for each occurrence, and \$2,000,000 annual aggregate. Coverage under this liability policy must be on an occurrence basis and the city shall be named as additional insured. Proof of such insurance must be sent to: Office of Risk Management, City of Dallas, 1500 Marilla, Dallas, Texas 75201, and the policy must provide for 30 days prior written notice to the Office of Risk Management of cancellation, expiration, non-renewal, or material change in coverage. All subrogation rights for loss or damage against the city are hereby waived to the extent that they are covered by this liability insurance policy.

(5) Each owner or tenant is responsible for maintaining the right-of-way landscaping in a healthy, growing condition, and for keeping the premises safe and in good condition and repair, at no expense to the city, and the city is absolutely exempt from any requirements to maintain right-of-way landscaping or make repairs. The granting of a license for landscaping under this subsection does not release the owner or tenant from liability for the installation or maintenance of landscaping in the public right-of-way.

(h) Plant requirements. Plants used to satisfy landscape requirements must comply with the following requirements:

(1) A large evergreen shrub must have the ability to grow to a minimum height of three feet within three years.

**SEC. 51P-714.118. ARCHITECTURAL DESIGN STANDARDS.**

(a) Purpose.

(1) The district is hereby designated as an area of historical, cultural, and architectural importance and significance. The architectural design standards of this section are intended to preserve the historical, cultural, and architectural importance and significance of the West Commerce Street/Fort Worth Avenue corridor. The corridor has historic and cultural importance as an early major east-west thoroughfare in the Dallas metroplex. The development patterns and architecture along the corridor reflect pioneer settlements; the Great Depression; mid-20th century Americana; and post-World War II automobile, nightclub, and restaurant culture. These architectural design standards are intended to preserve the character of the corridor while allowing compatible new construction and modifications that respect the corridor’s historical, cultural, and architectural significance.

(2) The purpose of these architectural design standards is to:

(A) ensure that new development enhances the character of the corridor and complement adjacent neighborhoods;

(B) ensure that increased density in established neighborhoods makes a positive contribution to the area's character;

(C) ensure the integrity of historic buildings and the compatibility of new development; and

(D) enhance the character and environment for pedestrians.

(b) Applicability. The architectural design standards of this section apply to:

(1) New construction and major modifications of buildings containing a nonresidential use.

(2) Buildings containing only residential uses.

(3) In Subdistrict 2D, facades constructed before February 1, 2005 do not count towards the facade calculations for purposes of determining compliance with this section.

(4) In Subdistrict 3C, buildings constructed before February 1, 2005 are not required to comply with this section.

(c) Plan review. The director shall review any plan submitted to determine whether it complies with the requirements of this section.

(d) Building orientation.

(1) Except as provided in 51A-714.118(e)(3), the primary facade and primary entrance of new construction must be oriented to face the public right-of-way. In Subdistrict 1E, in a building of less than 10 units, when the primary facade of an individual unit is immediately adjacent to right of way, its primary facade and primary entrance must be oriented towards the right of way. All other units within the building may be oriented to front on an open space.

(2) Except as provided in 51P-714.111(c)(1)(D), garage doors serving eight or fewer dwelling units may not face West Commerce Street or Fort Worth Avenue. In Subdistrict 1C, this provision applies only to individual vehicular garages for residential dwelling units.
