| Non-Residential and Vacant | | |
| Per 1,000 square feet | \$2.75 | |
| Minimum Charge | \$7.86 | |

Payments received after the due date will incur a 5% late fee.

Sewer charges for residential accounts are calculated on an average of the water billed in December, January, February, and March (40,000 gallons maximum) or the actual month's water consumption, whichever is less.

Sewer charges for general services and optional general services accounts are based on the month's water consumption unless sewer is metered separately.

Industrial wastewater discharges containing concentrations of BOD and/or Suspended Solids greater than 250 milligrams per liter are assessed sewer surcharges. Certain commercial users such as restaurants, bars/lounges, small food processors, and equipment service facilities are assessed standard surcharges. These surcharges are included as part of the monthly bill.
