

# Memorandum

CITY OF DALLAS

DATE October 21, 2016  
TO Honorable Members of the Quality of Life & Environment Committee: Sandy Greyson (Chair),  
Tiffinni A. Young (Vice Chair), Rickey D. Callahan, Mark Clayton, Philip T. Kingston, B. Adam McGough  
SUBJECT **Smart Growth for Dallas**

On Monday, October 24, 2016, you will be briefed on Smart Growth for Dallas. The briefing materials are attached for your review.

Please feel free to contact me if you have any questions or concerns.

A handwritten signature in black ink, appearing to read 'Willis Winters'.

Willis C. Winters, FAIA, Director  
Park and Recreation Department

c: A.C. Gonzalez, City Manager  
Larry Casto, City Attorney  
Craig D. Kinton, City Auditor  
Rosa A. Rios, City Secretary  
Daniel F. Solis, Administrative Judge  
Ryan S. Evans, First Assistant City Manager  
Eric D. Campbell, Assistant City Manager

Jill A. Jordan, P.E., Assistant City Manager  
Mark McDaniel, Assistant City Manager  
Joey Zapata, Assistant City Manager  
M. Elizabeth Reich, Chief Financial Officer  
Sana Syed, Public Information Officer  
Elsa Cantu, Assistant to the City Manager – Mayor & Council

# Smart Growth *for* Dallas

*Data-driven decisions for the future of Dallas'  
parks, open spaces, and green infrastructure*

Quality of Life Committee Briefing  
October 24, 2016

# Agenda

---

## I. Program Overview

## II. Presentation of Phase I Deliverables

*a) Citywide maps and analysis*

*b) High-priority opportunities for creation of new parks, and redevelopment or expansion of current parks*

## III. Next Steps

*a) Expanded GIS Analysis*

*b) Urban Heat Island Analysis*

*c) Community Engagement*

# I. PROGRAM OVERVIEW

# About The Trust for Public Land

---

The Trust for Public Land works across the country to create new parks and protect land for people, ensuring healthy, livable communities for generations to come.

Since our founding in 1972, we've created and protected more than 5,000 special places across the country. More than 7 million people live within a 10-minute walk of a place that we have created or protected. We have helped generate nearly \$60 billion in public funding for parks and natural areas through ballot measures supported by nearly 100 million voters in 37 states.

# About Our Partners

---

The buildingcommunityWORKSHOP is a Texas based nonprofit community design center seeking to improve the livability and viability of communities through the practice of thoughtful design and making. We enrich the lives of citizens by bringing design thinking to areas of our city where resources are most scarce.

The Texas Trees Foundation preserves, beautifies, and expands parks and other public natural green spaces, public streets, boulevards, and rights-of-way by planting trees and encouraging others to do the same through educational programs that focus on the importance of building and protecting the “urban forest” today as a legacy for generations to come.

WITH A GROWING  
POPULATION AND  
BOOMING ECONOMY,  
NORTH TEXAS STANDS  
ON THE CUSP OF A NEW  
ERA IN ITS HISTORY.

An aerial photograph of a city landscape. In the foreground, a multi-lane highway curves through the scene. To the right of the highway is a green park area with trees and a small blue pond. In the background, several tall skyscrapers are visible against a clear blue sky. The text is overlaid on the center of the image.

Through optimism and collaboration,  
our city is busy  
*re-creating*  
our public spaces in the most  
*extraordinary*  
ways imaginable.

BUT CHALLENGES STILL  
REMAIN...

# BUT CHALLENGES STILL REMAIN...

TEXAS TREES  
FOUNDATION

# Climate-Smart Cities™ program: objectives

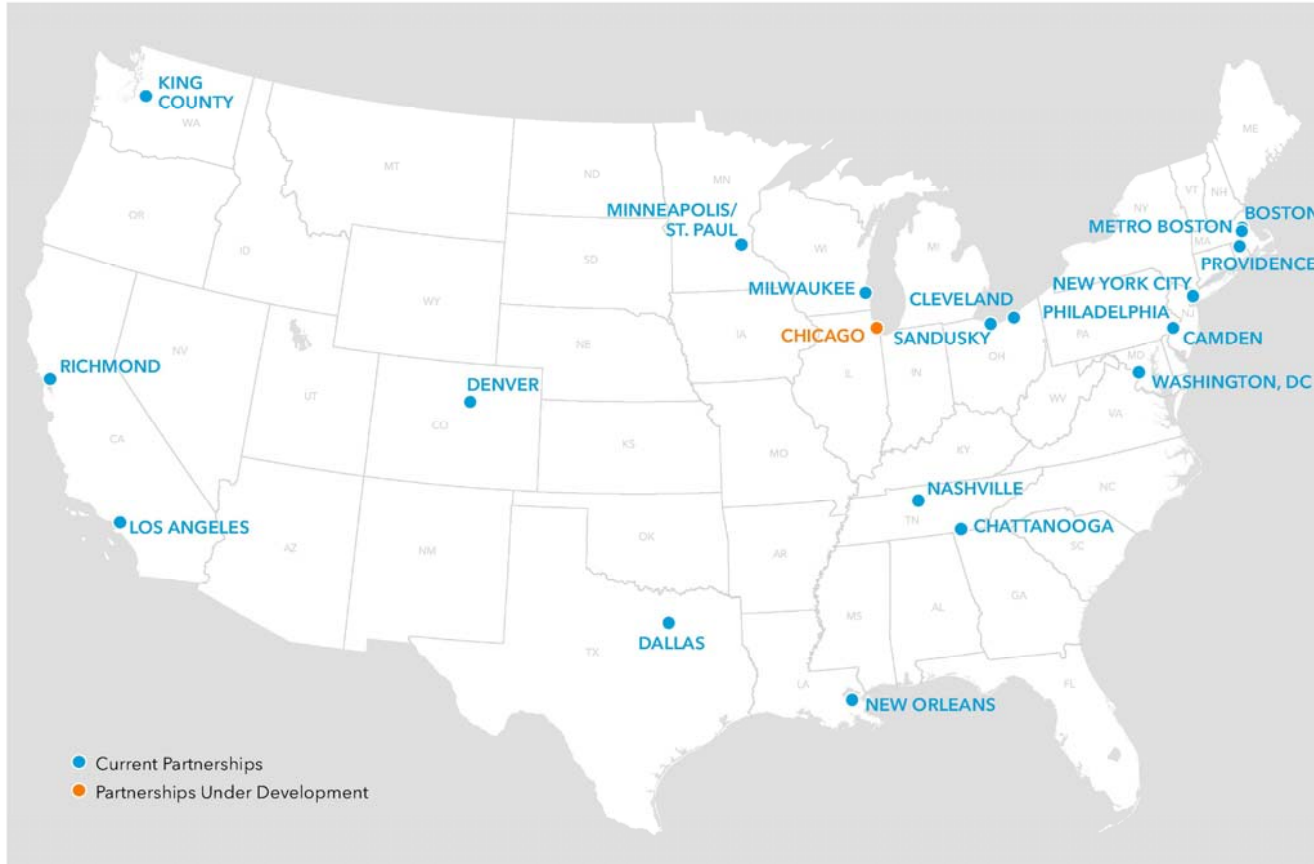

---

This program uses four strategies to help cities improve their climate resiliency:

Through data, analysis, and mapping, we are helping cities identify key opportunities for using parks to improve their resilience to the challenges posed by a changing climate

# II. PHASE I DELIVERABLES

## Citywide Maps and Analysis

# SMART GROWTH FOR DALLAS PHASE I ANALYSIS

# Phase I Ecological Objectives

---

- **ABSORB & PROTECT**

Parks and open space can absorb stormwater and serve as a buffer between rivers and surrounding development, providing flood protection. Our analysis identifies locations where green asset investments, such as expanded tree canopy or strategic park design and location can absorb stormwater and protect development from flooding.

- **COOL**

Well-positioned green space and canopy cover can reduce ambient temperature by 5° to 10° F. Our analysis identifies areas of Dallas where parks and open space can reduce urban heat islands and cool nearby neighborhoods.

# Phase I Social Objectives

---

- CONNECT

Many Dallas residents rely on biking paths, greenbelts, and linear parks for their daily transportation needs. Our analysis identifies areas where investments in cycling/pedestrian infrastructure can improve safety and improve connectivity between trails and transit.

- HEALTH

By creating opportunities for active recreation, parks and open spaces are able to improve the health of nearby residents. Our analysis identifies areas of Dallas where parks can help combat diabetes, heart disease, and asthma.

# Phase I Social Objectives *(continued)*

---

- EQUITY

Parks are particularly important to neighborhoods with a high prevalence of low-income households, children, senior citizens, and residents with limited English-proficiency. For these groups, parks fill the need for common public space that may not be readily available in their neighborhoods. Our analysis identifies areas of Dallas where parks can provide common public space for these groups.

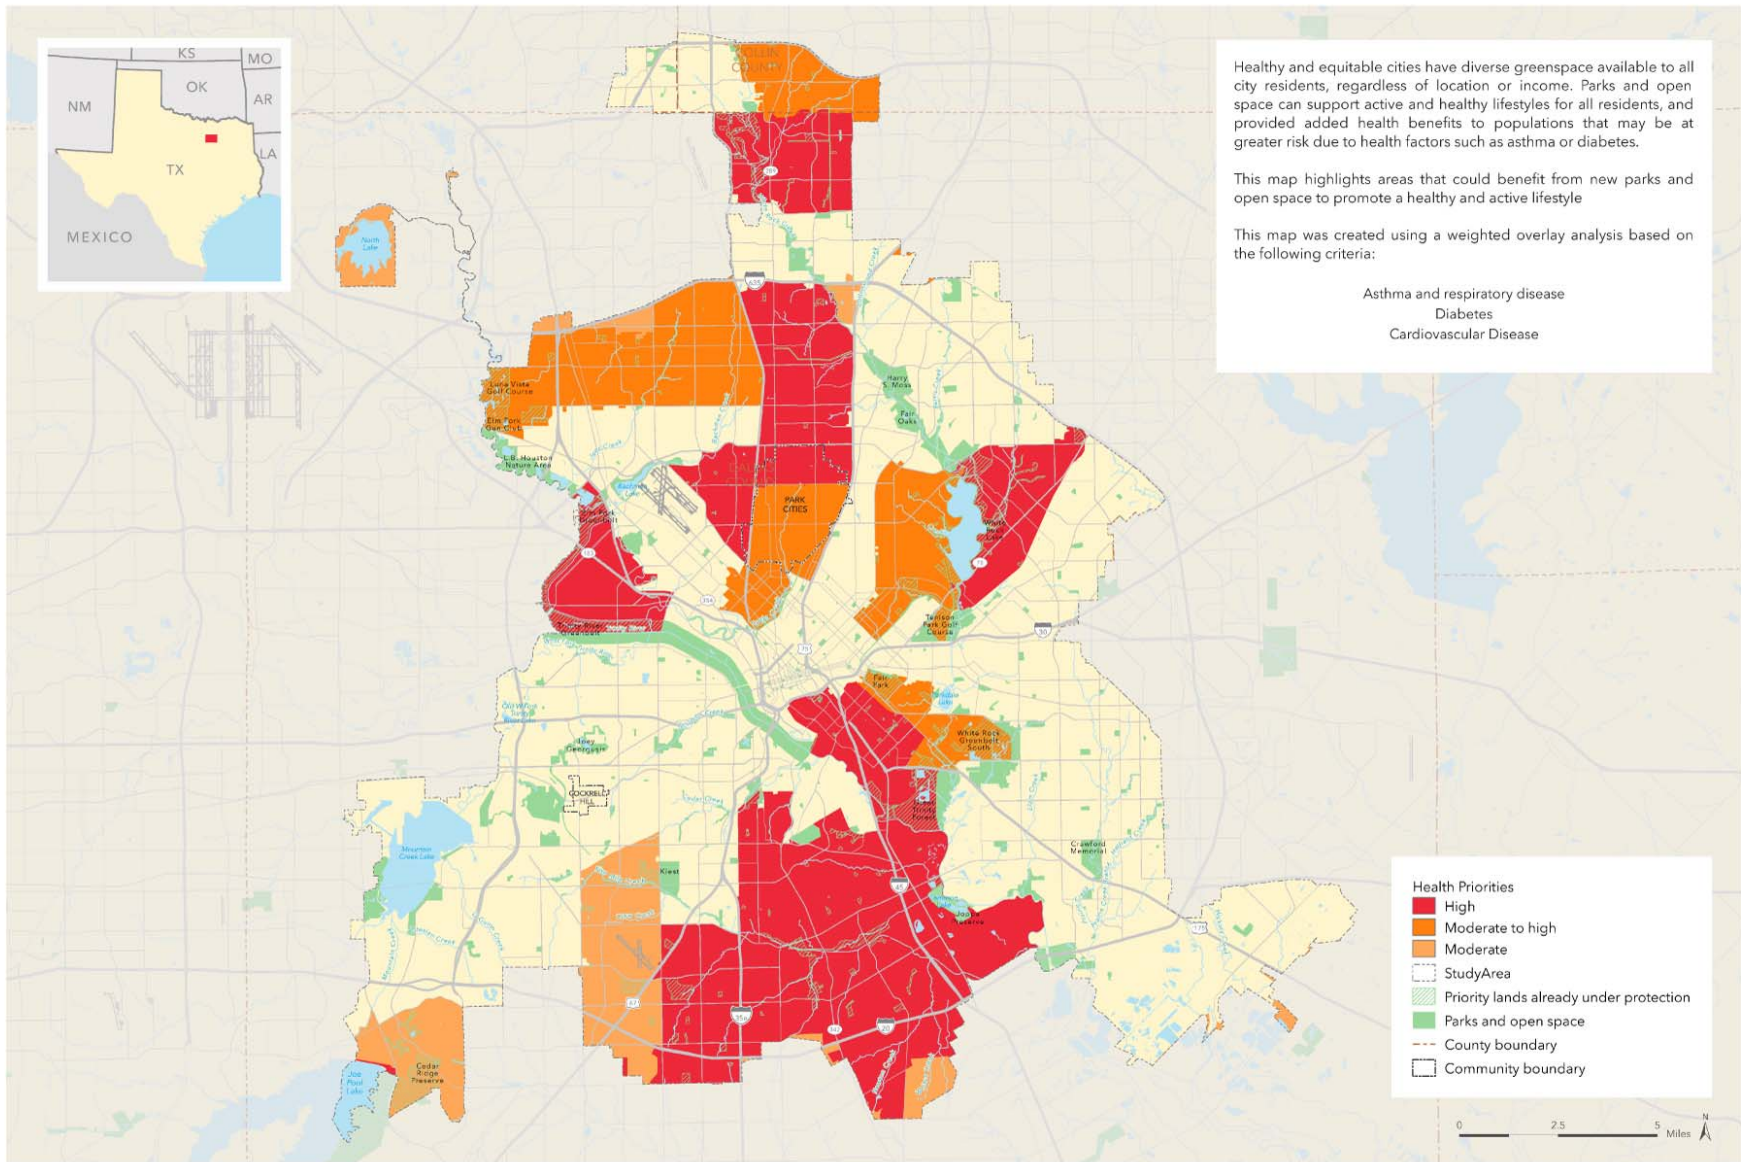

# Health

Increase access to active recreation in areas with high incidence of key public health challenges.

---

Criteria	Description
Asthma and respiratory disease	% of people within a zip code affected by asthma, emphysema, chronic bronchitis or sinusitis
Diabetes	% of people within a zip code affected by diabetes
Cardiovascular Disease	% of people within a zip code affected by angina, heart failure, coronary heart disease, heart attack, hypertension, or stroke

# Health

## CLIMATE-SMART CITIES: SMART GROWTH FOR DALLAS

August 17, 2016. Special thanks to the following data providers: City of Dallas, Truven Disease Prevalence by Zip Code - Parkland Hospital. Copyright © The Trust for Public Land. The Trust for Public Land and The Trust for Public Land logo are federally registered marks of The Trust for Public Land. Information on this map is provided for purposes of discussion and visualization only [www.tpl.org](http://www.tpl.org)

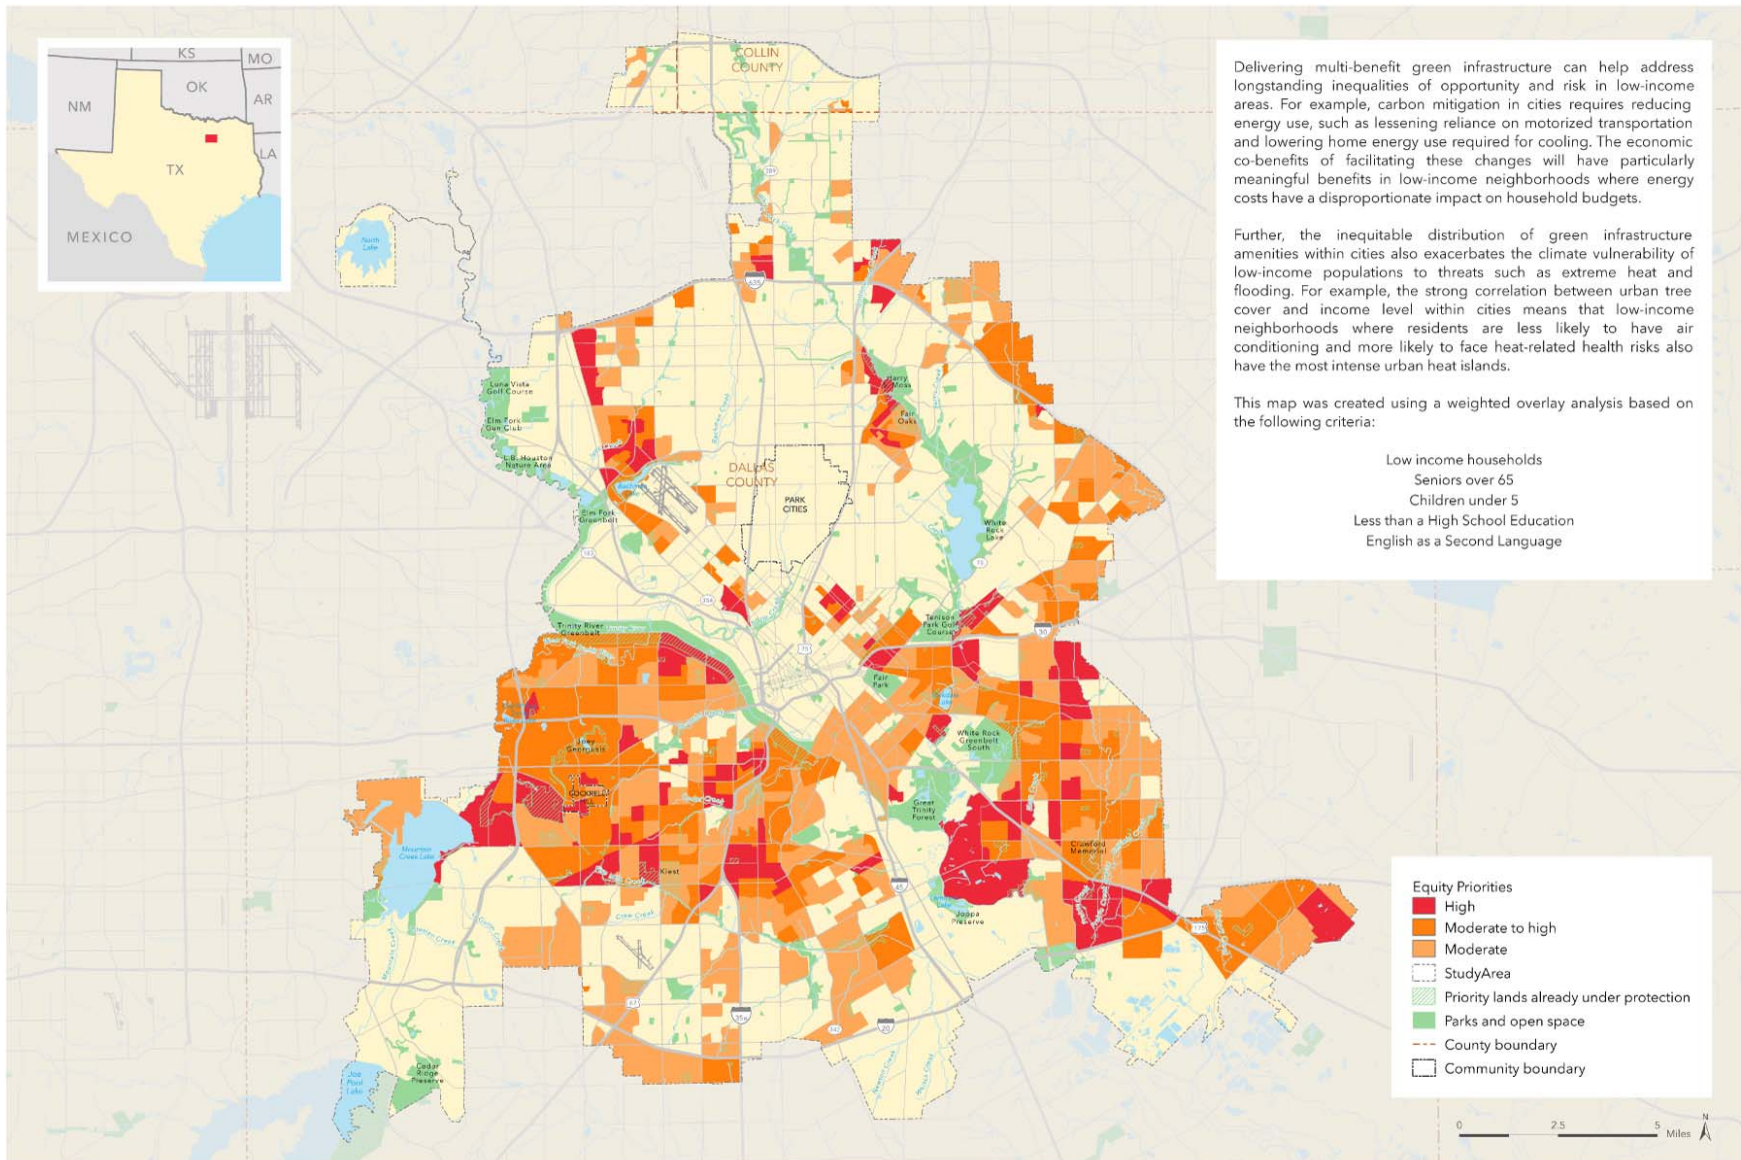

# Equity

Reduce barriers between social groups, improve park access for vulnerable and underserved populations, and make Dallas's parks and open space more equitable.

Criteria	Description
Low income households	% of households within a block group with an annual income less than \$25k
Seniors over 64	% of population within a block group over 64 years of age
Children under 5	% of population within a block group younger than 5 years of age
Less than a High School Education	% of population within a block group with less than a high school education
English as a Second Language	% of households within a block group where no one age 14 and over speaks English "very well" or speaks English only

\*From EPA's Environmental Justice Screen, a nationally consistent dataset that combines environmental and demographic indicators in maps and reports.

# Equity

## CLIMATE-SMART CITIES: SMART GROWTH FOR DALLAS

August 17, 2016. Special thanks to the following data providers: City of Dallas, 2015 American Community Survey. Copyright © The Trust for Public Land. The Trust for Public Land and The Trust for Public Land logo are federally registered marks of The Trust for Public Land. Information on this map is provided for purposes of discussion and visualization only [www.tpl.org](http://www.tpl.org)

# Connect

Enhance active transit connectivity through analysis of existing and planned bike infrastructure

---

Criteria	Description
Bikeway and trail gaps	Areas that lack access to trail and bike infrastructure based on existing and approved (funded) planned trails
Safety concerns – bike/ped accidents	Areas where there are safety concerns for bicyclists and pedestrians based on the density of vehicle-pedestrian and vehicle-bicycle crashes
Create connections to transit	Areas where green infrastructure can help connect people to public transit (Light rail and streetcar, where light rail was weighted higher)

# Connect

## CLIMATE-SMART CITIES: SMART GROWTH FOR DALLAS

August 17, 2016. Special thanks to the following data providers: City of Dallas Parks and Rec, Texas Crash Report Information System 2010-2015 - Texas Dept. of Transportation, Dallas Area Rapid Transit. Copyright © The Trust for Public Land. The Trust for Public Land and The Trust for Public Land logo are federally registered marks of The Trust for Public Land. Information on this map is provided for purposes of discussion and visualization only. [www.tpl.org](http://www.tpl.org)

# Absorb & Protect

Provide cost-effective stormwater absorption through parks, open space, and green infrastructure in areas prone to increased flooding. Improve flood protection and reduce flash flood risks through creation of greenways along waterbodies.

Criteria	Description
Estimated runoff potential	Areas with potential for high amounts of runoff & flooding during storms. Calculated using soil type and land use information.
Wetlands, waterbodies, streams buffer	Wetlands, waterbodies and streams buffered by 100 feet to create high priority areas.
Floodways and flood zones	FEMA's floodzone areas were translated directly into priority areas
Escarpment areas in southern Dallas	Escarpment areas in southern Dallas, mapped by the city, were buffered by 200 feet.

# Absorb & Protect

## CLIMATE-SMART CITIES: SMART GROWTH FOR DALLAS

August 17, 2016. Special thanks to the following data providers: SSURGO2.2 - Natural Resource Conservation Service, North Central TX Council of Govts, National Wetlands Inventory (US Fish and Wildlife Service), Flood Hazard Areas - FEMA, Escarpment Overlay - City of Dallas. # II. PHASE I DELIVERABLES

## High-Priority Opportunities

# How much land is available for parks?

---

- We identified over 3,500 acres of land that we consider “high opportunity” for new park development.
  - 1,600 acres are publicly owned (City of Dallas, DART, etc.)
  - 1,900 acres are privately owned
  - All land is considered vacant
  - In areas currently underserved by parks
- The county appraisal districts value the privately-owned land at \$117 million.
- If we consider just the five largest park creation opportunities in each council district, we have identified 669 acres of land, valued at \$52 million.

# V. INTRODUCING PHASE II

# PHASED APPROACH:

## *Smart Growth for Dallas: Phase II*

# Additional Deliverables

---

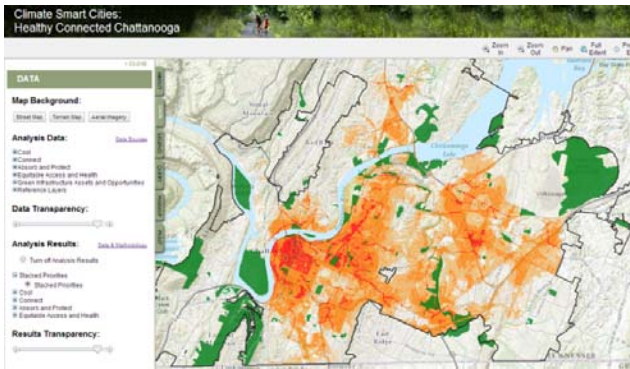

**INTELLIGENCE**

# Expanded GIS Analysis and Interactive Decision Support Tool

- **EXPANDED GIS ANALYSIS**
  - Addition of dozens of new GIS layers to model
  - Addition of new planning objectives, including Activate Educate
  - Incorporate new Texas Trees Foundation urban heat island research
- **DECISION SUPPORT TOOL**
  - Interactive web-based platform to provide customizable map-based analysis of land in Dallas, based on identified economic, social, and ecological objectives.
  - Provides extensive data and priority modeling results at the parcel level
  - Users may identify high-value parcels, analyze parcels against spatial data, and make individual parcel reports
- **ECONOMIC ANALYSIS**
  - Economic analysis of recreation, health, and property value benefits of potential new parks

# Urban Heat Island Analysis

# Identifying Use Cases

- **CURRENT CONDITIONS ANALYSIS**

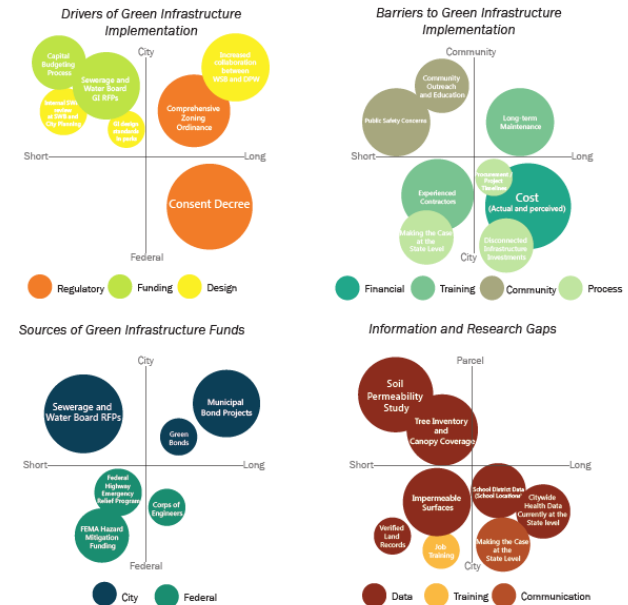

*Identify key opportunities, barriers, funding sources, key decision makers, and information gap related to implementation of multi-benefit greening.*

- **IDENTIFY USE CASES**

*Using current conditions analysis, identify use cases for decision support tool. Through this iterative process, patterns, common themes, and shared opportunities are identified.*

- **DEVELOP PROJECT TYPOLOGIES**

*Use cases are further refined, including identification of ad-hoc “early win” projects. Identify long-term, self-sustaining programs (e.g. green alleys or schoolyard conversions).*

**INTELLIGENCE + PARTNERSHIP**

# Community Engagement

*For Dallas to make the smartest investments possible and ensure we're setting ourselves up as a city of great public spaces – we need to know information that can't be captured by quantitative data alone.*

# Community Engagement

*We need to know how residents use parks, which parks they are or are not using, and what drives their use of parks. And we need to ask them to dream and help us imagine what these parks should be – they're the experts.*

# Community Engagement

*Their local knowledge increases our ability to identify all the nooks and crannies of Dallas that are potential public spaces and connectors. Local knowledge helps us better understand and interpret the data we already have.*

# Community Engagement

## SCHEDULE

- *Online survey available **today** at: [www.SmartGrowthForDallas.org](http://www.SmartGrowthForDallas.org)*
- *8 large community meetings:*
  - *Establish what questions we still need to ask*
  - *Inform the public about the technology that's being developed*
  - *Gather collective input for Dallas' investment in parks and public space.*

Community Engagement Kickoff Meeting:  
November 10, 2016 @ Heritage Village  
5:30pm

# Community Engagement

## SCHEDULE

- *20 small meetings – to engage an array of experts on parks and open space to better understand how they're used, how they work, and how they're maintained.*
  - *Dates TBD: Friends of parks groups, parks maintenance, parks and open space advocates, neighborhood groups, and others to be decided*
- *City-wide convening to report engagement findings*
  - *Early 2017*
- *4 city-wide convening's to report final products*
  - *Early 2018*

# Community Engagement

## MEDIA

- *Web updates*
- *SmartGrowthForDallas.org*
- *Park Stories short film series*

# Open data for the public good

---

**INTELLIGENCE + PARTNERSHIP + LEVERAGE**

# Dallas is falling behind on investment

CITY	TOTAL SPENDING	OPERATING SPENDING PER RESIDENT	CAPITAL SPENDING PER RESIDENT	TOTAL SPENDING PER RESIDENT
Seattle	\$187,501,978	\$200	\$81	\$281
San Francisco	205,298,303	186	54	241

Atlanta	66,824,811	120	27	147
Dallas	97,520,012	52	24	76

# The power of leverage

---

A recent study by HR&A Advisors found that in Dallas:

- Investments in Dallas's parks yield a 1:7 return
- Investments in Dallas's trails yield a 1:50 return
- Each year, the Dallas parks system generates \$678 million in economic benefits
- Each \$1 increase in spending per resident leads to an \$8.9m increase in economic benefits for the entire city.

And with land value only increasing, now is the time to act.

Dallas' green assets offer  
cost-effective and unique  
strategies for addressing  
the city's biggest

*economic*  
*social*

and *ecological*  
challenges of today.
